PYTHON SCRIPT

Date	19 September 2022
Team ID	PNT2022TMID17225
Project Name	IoT Based Safety Gadget For Child Safety Monitoring & Notification

AIM:

To develop a python script

PROGRAM:

File Edit Format Run Options Window Help

```
import time
import sys
import ibmiotf.application
import ibmiotf.device
import random
organization = "cp5ijq"
deviceType = "priya02l0devicetype"
deviceId = "priya02l0deviceid"
authMethod = "use-token-auth"
authToken = "xWgbIB!h_bEOTlxmjW"
def myCommandCallback(cmd):
    print("Command received: %s" % cmd.data['command'])
    status=cmd.data['command']
    if status=="lighton":
        print ("led is on")
    else :
        print ("led is off")

try:
        deviceOptions = {"org": organization, "type": deviceType, "id": deviceId, "auth-method": authMethod, "auth-token": authToken}
        deviceCli = ibmiotf.device.Client(deviceOptions)

except Exception as e:
        print("Caught exception connecting device: %s" % str(e))
        sys.exit()

deviceCli.connect()

while True:

        temp=random.randint(0,100)
        Humid=random.randint(0,100)

        data = { 'temp' : temp, 'Humid': Humid }

        def myOnPublishCallback():
            print ("Published Temperature = %s C" % temp, "Humidity = %s %%" % Humid, "to IBM Watson")

        success = deviceCli.publishEvent("IoTSensor", "json", data, qos=0, on_publish=myOnPublishCallback)
        if not success:
            print("Not connected to IoTF")
        time.sleep(1)

        deviceCli.commandCallback = myCommandCallback

deviceCli.disconnect()
```

RESULT:

Thus the python code was developed to design the safety gadget.
