

PROJECT DEVELOPMENT PHASE

SPRINT-3

IBM WATSON IOT PLATFORM

STEPS:

- First create an IBM cloud account with IBMid and password.
- Home page of IBM cloud.
- Click on the catalog on the top.
- Click on IoT in the category mentioned.
- If already a lite is present delete it else u can't create another.
- Enter the location and in the configure your resource type the service name and choose the plan, tick the agree with agreements and then click on create.
- Internet of Things Platform Child safety will be created, where there are different options like manage, plan, and connection (manage is for launch, Plan gives us the idea about the payment package and its upgrades, and lastly the connection is for to connect IoT with other services)

The screenshot shows the IBM Cloud 'Catalog' page for the 'Internet of Things Platform'. The page is divided into several sections:

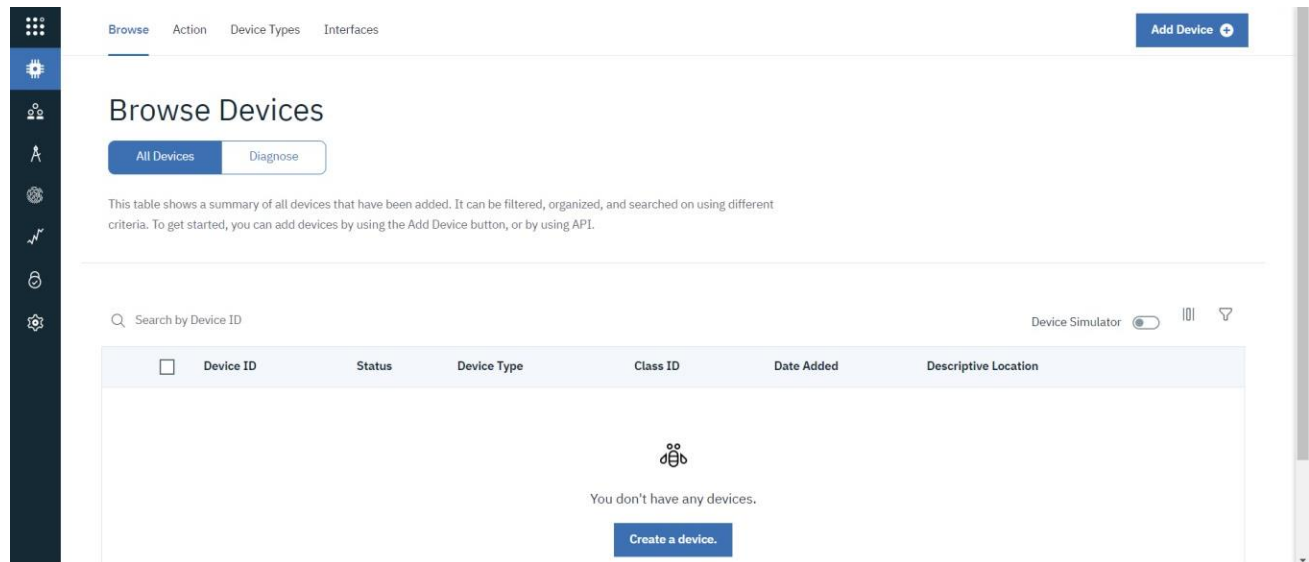

- Header:** Includes the IBM Cloud logo, a search bar, and navigation links for 'Catalog', 'Manage', and a user profile 'JYOTI PRAKASH M S's ...'.
- Service Overview:** Features the IoT icon, the title 'Internet of Things Platform', and a description: 'This service is the hub of all things IBM IoT, it is where you can set up and manage your connected devices so that your apps can access their live and historical data.' Below this are 'Create' and 'About' tabs.
- Configuration Section:**
 - Type:** Service
 - Provider:** IBM
 - Last updated:** 08/15/2022
 - Category:** Internet of Things
 - Compliance:** IAM-enabled
 - Location:** A dropdown menu with options: Frankfurt, London, Dallas, and Washington DC.
 - Related links:** Docs
- Select a location:** A dropdown menu currently showing 'Frankfurt (eu-de)'.
- Select a pricing plan:** A section with a note: 'Displayed prices do not include tax. Monthly prices shown are for country or location: [United States](#)'. Below this is a table:

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric Maximum of 500 registered devices Maximum of 500 application bindings Maximum of 200 MB of each of data exchanged, data analyzed and edge data analyzed	Free

Below the table, a note states: 'The Lite service plan for Internet of Things Platform includes up to 500 registered devices, and a maximum of 200 MB each of ed, and edge data analyzed per month.'

- Summary Panel (Right):**
- Internet of Things Platform** (Free)
- Location: Frankfurt
- Plan: Lite
- Service name: Internet of Things Platform-dr
- A checkbox labeled 'I have read and agree to the following license agreements:' with a link to 'Terms'.
- 'Create' and 'Add to estimate' buttons.

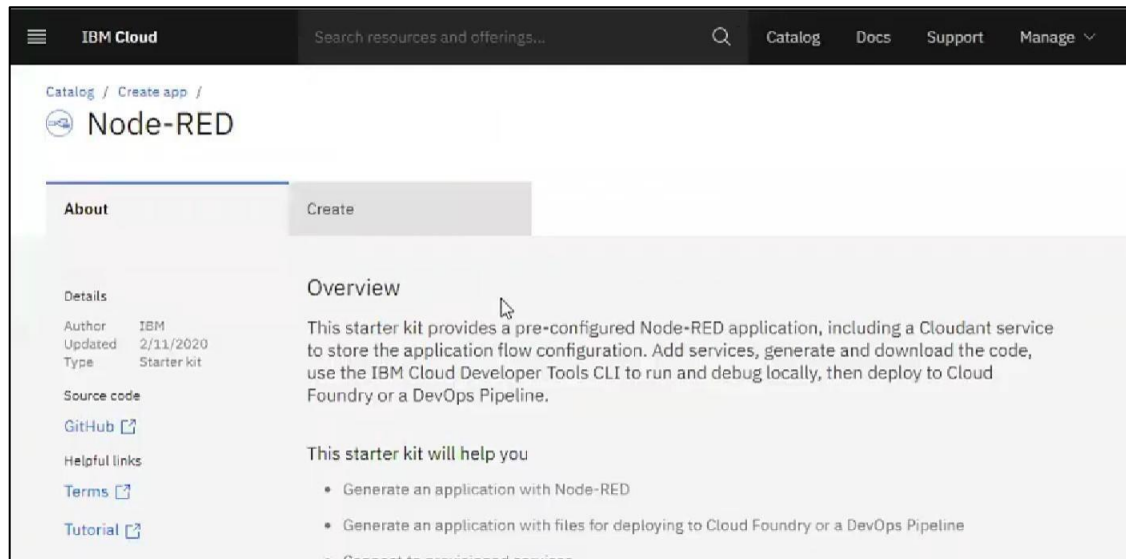

- After Clicking the Launch Button select the Devices option and click on adddevice and complete the Device Setup.

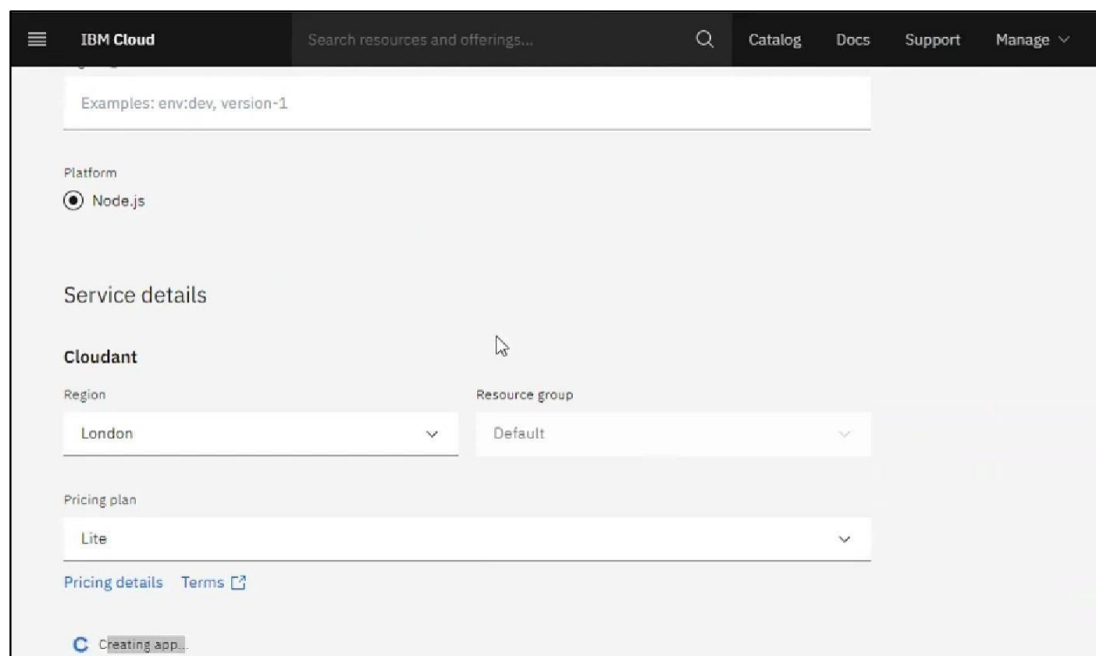

- Clicking on the device tab we can now see the added device. Clicking on it will display the other details. It has different tabs like Identity, Device Information, State and login.
- In a similar way, we can create n number of devices with a 50 per pagelimit as per the requirement of our project.
- The Boards will display card for the project.

NODE-RED SERVICES

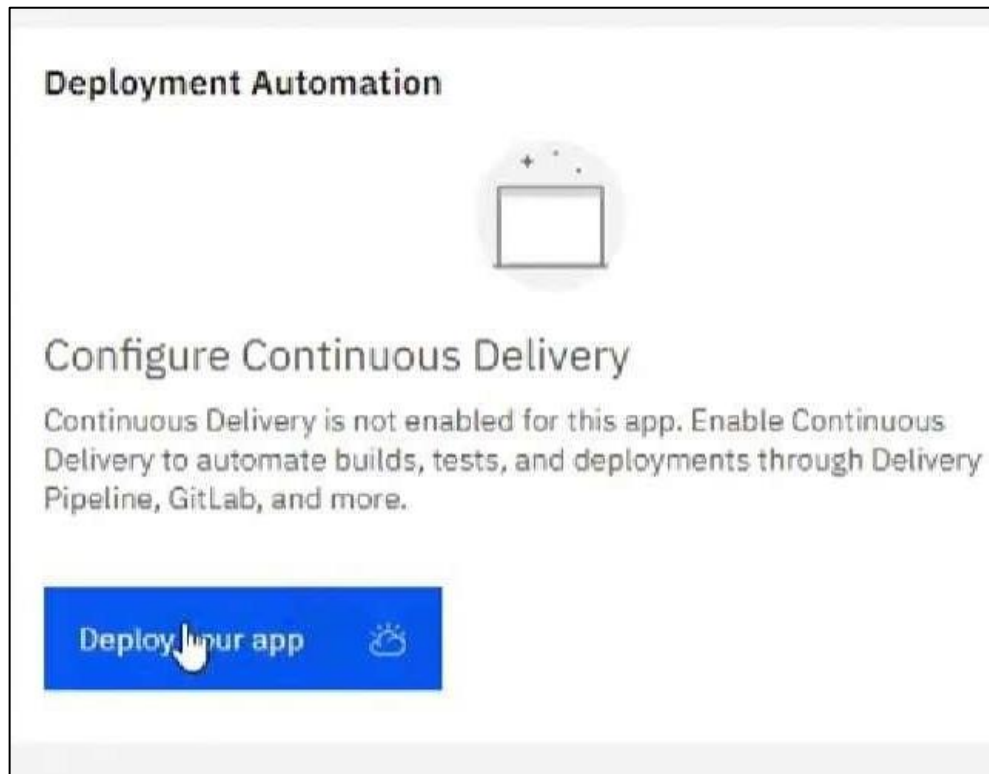

- Navigated to the App creation page

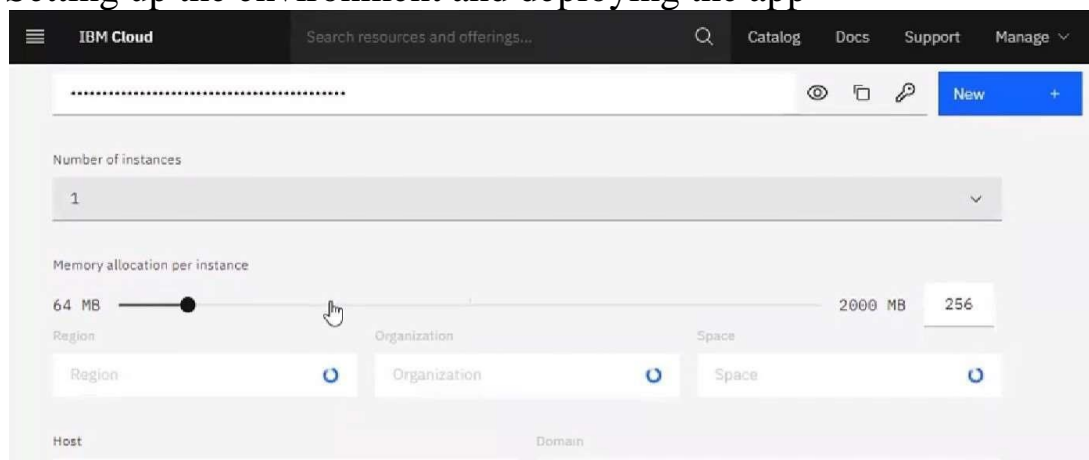

- Entered project details and clicked on create

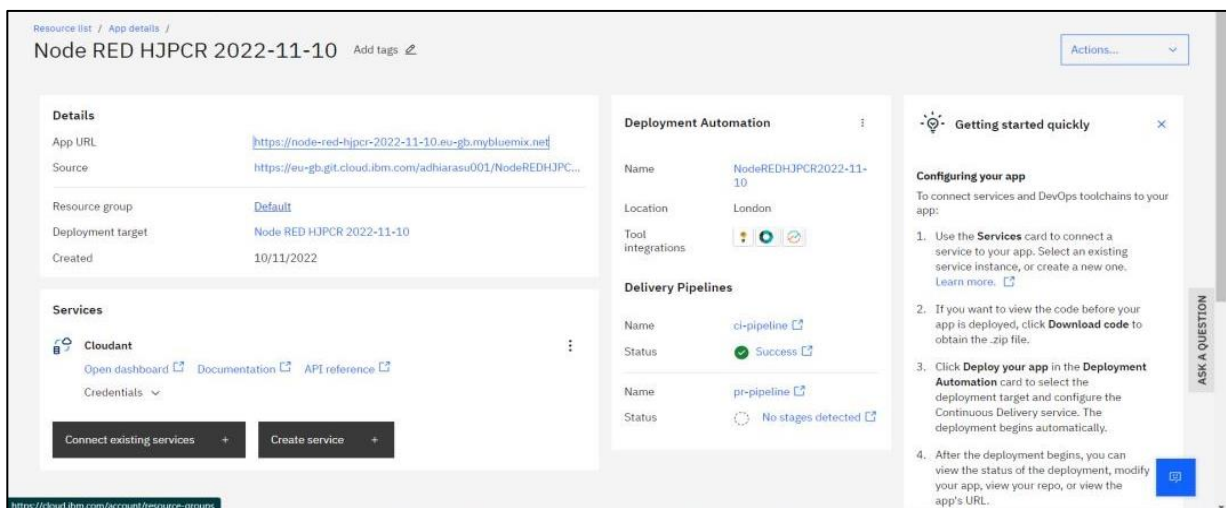

- Clicking on the “Deploy your App” Button

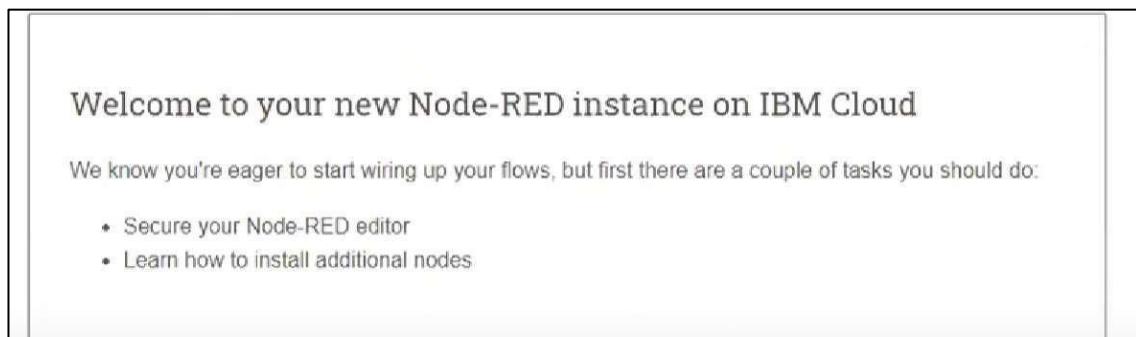

- Setting up the environment and deploying the app

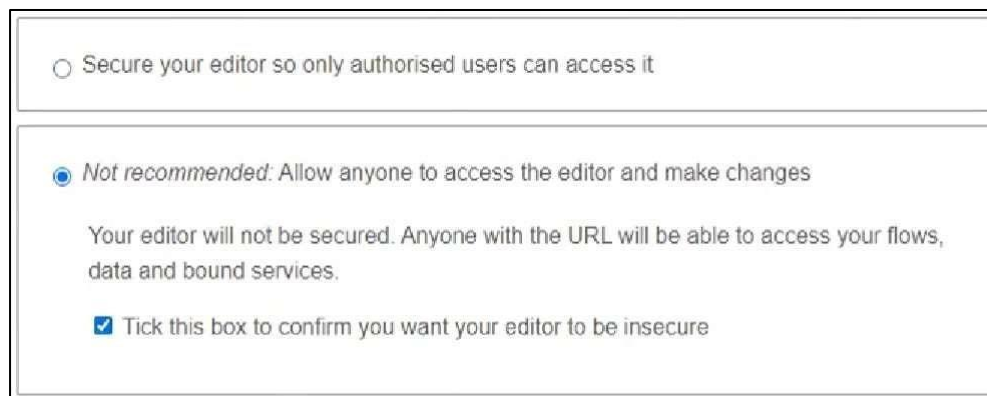

- Successfully deployed the app

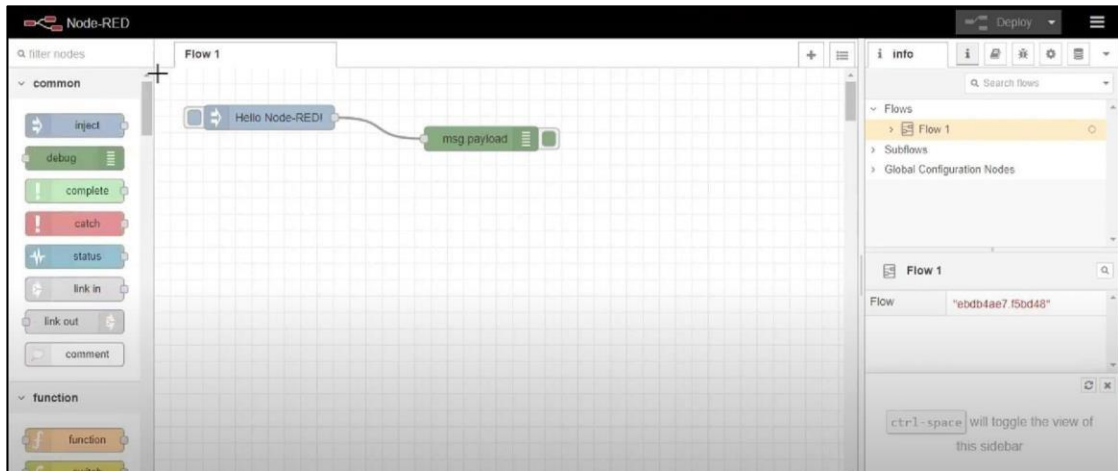

- Welcomed by the instance editor

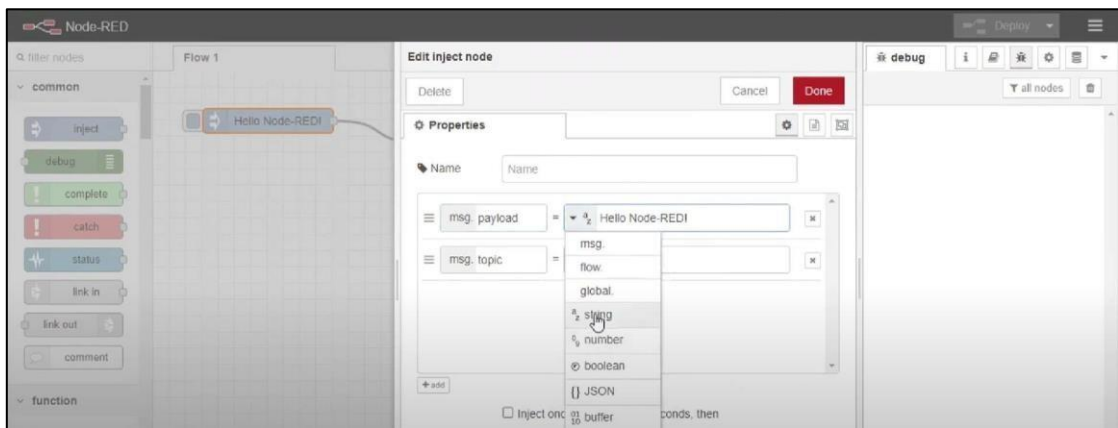

- Setting up credentials

- Dragged and dropped components into the editor

- Editing some values of the properties

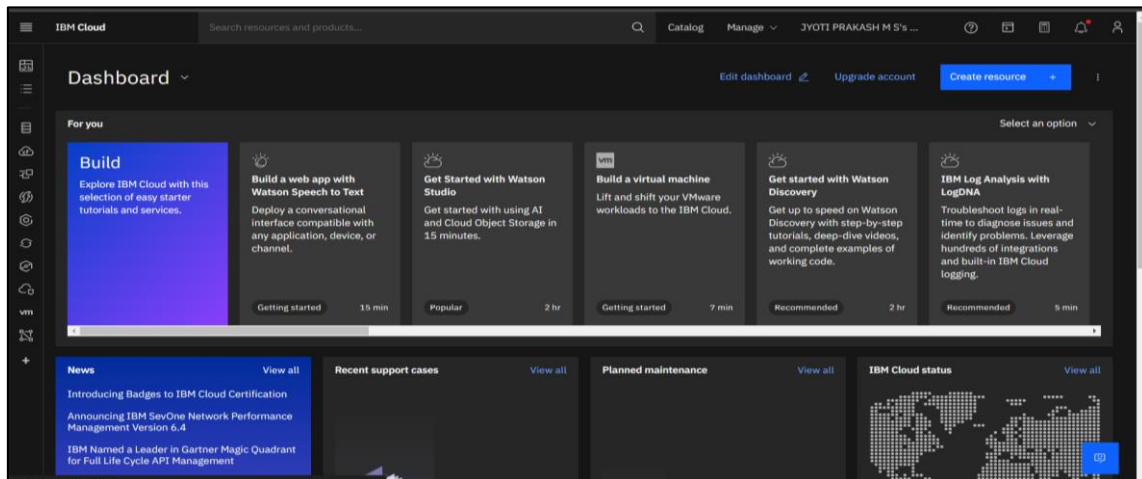

- Successfully deployed the app

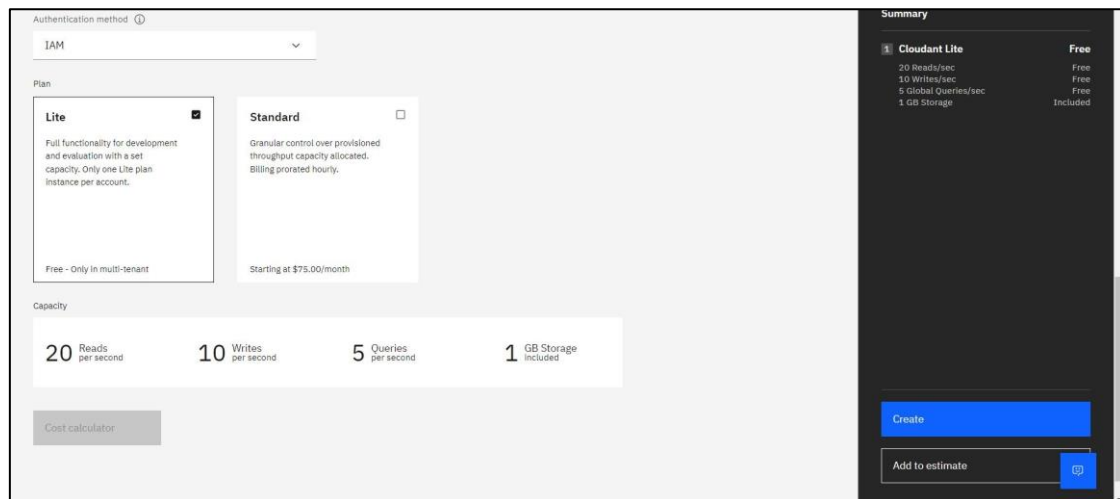

DATABASE IN CLOUDANT DB

To create a database in Cloudant DB to store location dataSteps:

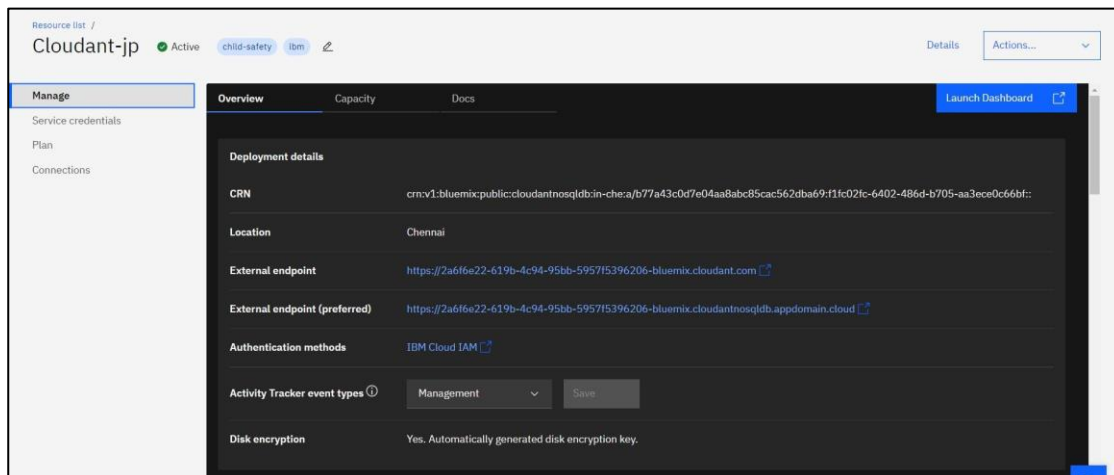

- Log in to IBM Cloud account
- Click “Create Resource +” button

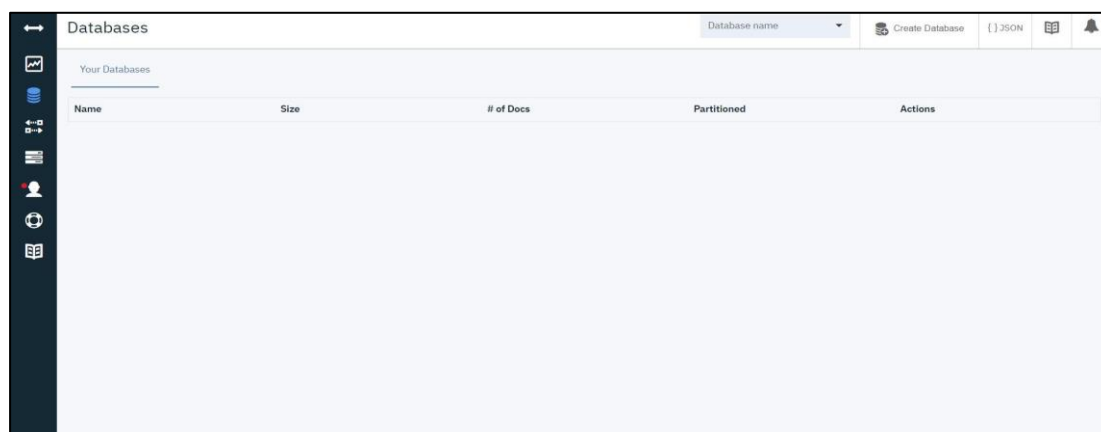

- Search for “Cloudant”
- Choose the “Lite Version”
- Click on “Create”

- The Cloudant database resource created

- click on launch dashboard

Click “Create Database”. Entered “Jyoti Prakash M S” as the databasename and the “Non-partitioned” option

- The database “Jyoti Prakash M S” has been created.
